English	Fluent
German	Learning

EDUCATION

Bachelor in Computer Science
ISTEC
2020 – 2022

CTeSP in Mobile Development
ISTEC
2018 – 2020

PROFILE

Technology enthusiast always chasing the latest trends and ready for new challenges. Sparked by Kevin Mitnick's Ghost in the Wire, I developed a deep passion for cybersecurity — from vulnerability exploitation to social engineering — and actively sharpen these skills to fuel continuous growth. Sociable and driven, I thrive equally in focused technical work and collaborative team environments.

EXPERIENCE

Cybersecurity Senior Consultant — Deloitte Portugal, Lisbon — Jul 2026 – Present

- Lead L2/L3 incident response and threat investigation across complex enterprise environments.
- Develop detection use cases and security automation to improve SOC efficiency.
- Advise clients on security technologies and best practices; mentor junior team members.
- Support major security incidents and crisis response in collaboration with global security teams.

Internship Mentor — Deloitte Portugal, Lisbon — Jun 2025 – Aug 2025

- U@Deloitte Summer Internship — Supervised interns in research and evaluation of deepfake detection tools intended for client offerings.

Cybersecurity Consultant — Deloitte Portugal, Lisbon — May 2025 – Jul 2026

- Advanced threat monitoring, detection, and triage across endpoint, cloud, and SIEM platforms.
- Ownership of L2/L3 incident response including investigation, containment, and remediation.
- Detection engineering, alert tuning, and security automation to improve SOC efficiency.
- Vulnerability analysis and risk prioritisation aligned with enterprise security objectives.

Consultant — SecOps — Capgemini Engineering Portugal, Lisbon — Feb 2024 – May 2025

- Threat monitoring, detection, incident response, and decision-making in incident mitigation.
- Vulnerability management and security automation across enterprise environments.
- Effective cross-department collaboration with IT, Legal, Executive, and stakeholder teams.
- Managed documentation and knowledge transfer through procedural documents and ticketing systems.
